

Product Information Sheet

Product

Bio Dunisoft® (Napkins and Duniletto® slim)
Certified for Ok Compost Home

Raw Material

Wooden pulp

Additives

Dyes
Binder

Packaging

CU packaging Napkins PP foil
CU Packaging Duniletto® Slim Cardboard box with/without PET window
CU Packaging Fingerfood Cardboard box
Outer packaging Corrugated board

Field Of Application

The product is intended for the use of enhancing the tabletop environment.

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

The packaging of this product complies with the applicable requirements of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR). Compliance is supported by technical documentation maintained by the manufacturer. Certain PPWR requirements will be further specified through delegated acts, implementing acts, guidance and harmonized standards. Compliance is therefore assessed against the applicable provisions of the Regulation and available guidance at the time of issue. For the PPWR Declaration of Conformity (DoC), please see the separate PPWR DoC document.

Environmental Aspects**Product**

The Bio Dunisoft products are manufactured from ECF-pulp (Elementary Chlorine Free), i.e. pulp bleached without using chlorine gas. The pulp is white or dyed. The binder used is fossil-free.

Product is FSC certified according to "Mixed Sources" certification number DNV-COC-000148.

The Bio Dunisoft material is certified according to Test Program with reference OK 2 edition D "Home compostability of products", No. TA8022206997. Printed napkins can be labelled with OK Compost only, if ink amount calculation is positive.

PFAS (per- and polyfluoroalkyl substances) are not being used in any step of manufacturing.

Packaging

The PP foil, used for napkins, is made from virgin plastic.

The cardboard box for Duniletto® Slim and Fingerfood is made from recycled fibres.

The corrugated board box for transportation is unbleached and to a large extent made of recycled fibres.

Product Safety

The product (incl. printing inks when applicable) fulfils the following:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No. 1935/2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food (Framework regulation).

- Commission regulation (EC) No 2023/2006 of 22 December 2006 on good manufacturing practice for materials and articles intended to come into contact with food (GMP regulation).
- Lebensmittel-, Bedarfsgegenstände und Futtermittelgesetzbuch (LFGB) of 20. December 2022.
- German BfR Recommendation XXXVI. Paper and board for food contact (BfR - German Federal Institute of Risk Assessment).
- Order No. 681 of May 25 (2020) from Danish Ministry of Environment and Food on ban of per- and polyfluoroalkyl substances (PFAS) in paper and cardboard food contact materials.
- Dutch Warenwet VGB 2014-03
- Swiss Ordinance No. 817.023.21 on Materials and Articles in contact with Food from 23rd November 2005 (Swiss Consumer Goods Ordinance).
- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

End of Life

Compostability

Products bearing the OK Compost HOME label are certified as compostable in a home composting environment. Under appropriate home composting conditions, the products are designed to biodegrade and disintegrate.

Ok Compost Home

Certificate for the awarding and use of the OK Compost HOME conformity mark: TA8022206997.

In some regions, certified compostable products may be accepted together with food waste. Disposal rules vary locally, therefore please consult your local waste management provider for guidance on the appropriate disposal route.

Recycling

Collection, sorting and material recovery are all part of the recycling process. Recycling is dependent on local waste handling infrastructure.

Used products should be handled according to local regulations, for best guidance, please check with local waste handling company.

Recycling of the packaging material is possible.

- Bio Dunisoft®
Recycling depends on collection, sorting and general material acceptance. Consult with a local waste handler for recycling recommendations.
- Packaging material (Napkins)
Can be recycled as plastic.
- Packaging material (Duniletto Slim and Fingerfood)
Can be recycled as paper.
- Outer Packaging material
Can be recycled as paper.

Energy Recovery

Incineration facilities for energy recovery are dependent on local infrastructure. Incineration for energy recovery is a good alternative when material recovery is not available by recycling.

Validity

This is issued 2026-09-07. It is revised when there is a change in the manufacturing process, in the product or in legislation.
