

Product Information Sheet

Product

Wooden cutlery, stirrer and chopsticks (without coating)

Material

Birch wood

Packaging

The cutlery and chopsticks are packed in a PE bag.

The stirrers are packed in a dispenser box and do not come with a PE-bag. The box is made from paperboard.

The outer transportation box is made from corrugated board

Area of Use

The cutlery can be used safely with all types of food, serving cold or hot up to 70°C.

The cutlery is not suitable to be used in a microwave oven.

Various foods may affect the physical properties of wood. Duni advises customers to test their applications for suitability.

Packaging and Packaging Waste

The products' packaging complies with all essential requirements of Directive 94/62/EC on packaging and packaging waste as well as the forthcoming Packaging and Packaging Waste Regulation (PPWR), Regulation (EU) 2025/40.

Environmental Aspects**Product**

The cutlery is made from birch wood which is a renewable source.

The cutlery is FSC certified according to "Mixed Sources" certification number DNV-COC-000148.

PFAS (per- and polyfluoroalkyl substances) are **not** being used in any step of the manufacturing of the products covered by this data sheet.

Packaging

Polyethylene is used for packaging purposes to protect the product and is derived from fossil source. The dispenser box is made from virgin fibres. The corrugated board box is unbleached and to a large extent made of recycled fibres.

Product Safety

The product fulfils the following:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP - Good Manufacturing Practice)
- Analysis has been performed according to LFGB (Lebensmittel- und Futtermittelgesetzbuch, Germany Regulation).
- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

End of Life

Recycling

Collection, sorting and material recovery are all part of the recycling process. Recycling is dependent on local waste handling infrastructure.

Although made from natural materials, the wooden cutlery is not suitable for composting or disposal with food waste, as it does not break down within the required timeframe. As there is typically no dedicated recycling system for wood cutlery, it should be disposed of with residual (general) waste. For further details, local waste-management guidelines should be consulted for accurate disposal instructions.

Packaging materials may be recyclable; follow local recommendations.

Energy Recovery

Incineration facilities for energy recovery are dependent on local infrastructure. Incineration for energy recovery is a good alternative when material recovery is not available by recycling.

Validity

This is issued 2026-04-22. It is revised when there is a change in the manufacturing process, in the product or in legislation.
